

# Examples of relative Trisections

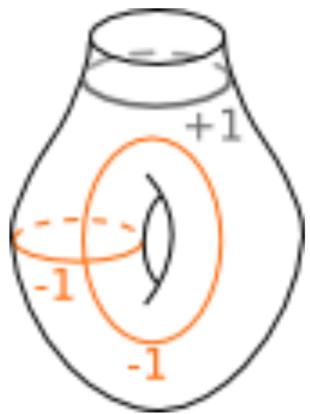

Part A: Fillings of open books

Part B: pieces in cut-and-paste  
operations

# Fillings of open books

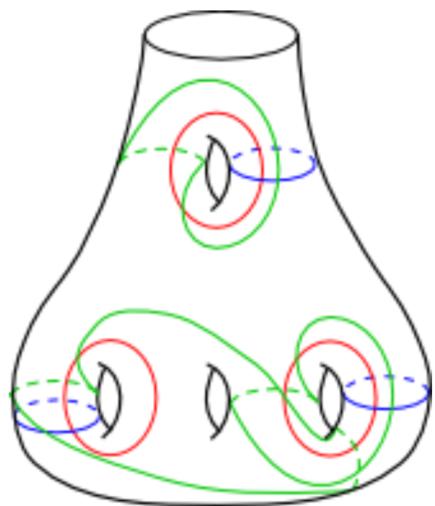

1.  $\mathbb{P}$  as  $-1$  surgery along  $T_{2,-3}$

Surgery on open book of  $S^3$   
given by  
 $T_{2,-3}$  plumbing

Right-veering monodromy  $\Rightarrow$   
open book supports a **tight**  
contact structure

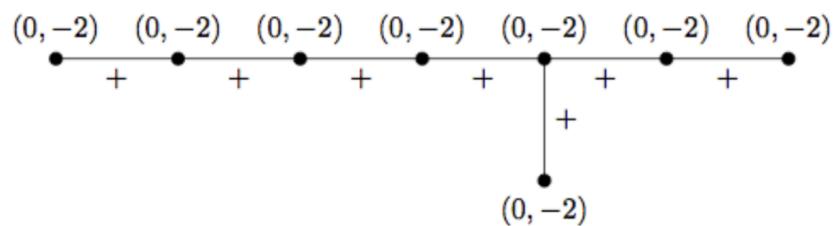

Trisection of  $B^4 \cup 2\text{-handle}$

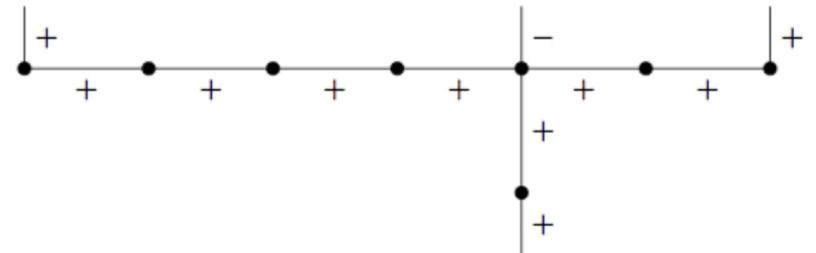

$b_2(B^4 \cup 2\text{-handle}) = 1 < 8 \Rightarrow$   
 $B^4 \cup 2\text{-handle}$  is not homeomorphic  
to  $E_8$  manifold  $\Rightarrow$   
 $B^4 \cup 2\text{-handle}$  is **not Stein**

# Fillings of open books

2.  $\mathbb{P}$  as boundary of  $E_8$  with planar open book

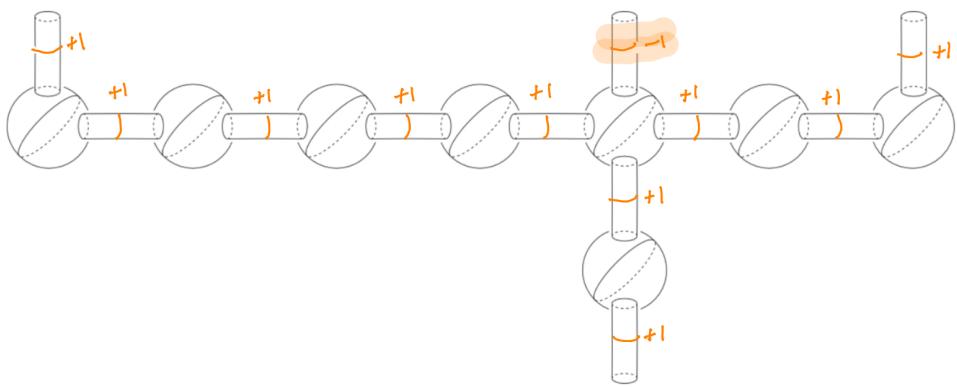

(a) The plumbing graph  $E_8$ .

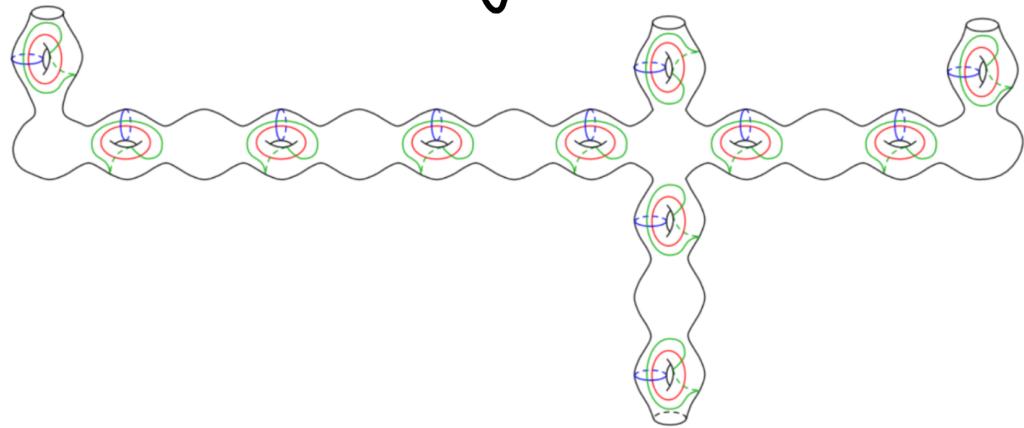

(b) The modified plumbing graph  $E_8^*$

Planar open book

Monodromy not right-veering  $\Rightarrow$   
contact structure not tight

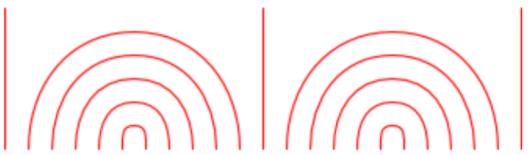

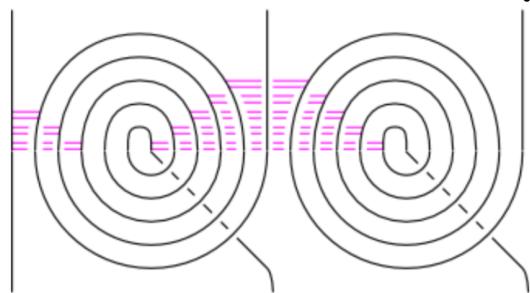

Trisection diagram

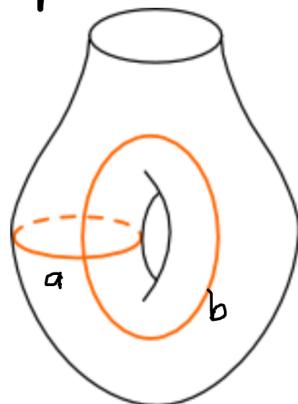

Lefschetz fibration not positive  
 $\Rightarrow$  not Stein structure

# Fillings of open books

3.  $P$  as 2-fold cover of  $S^3$  branched over  $T_{3,5}$   
Braided surface

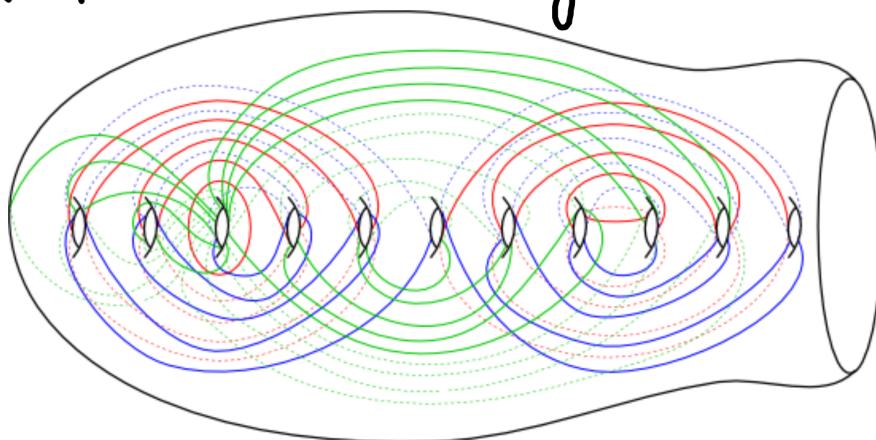

Open book

Monodromy is  $(\tau_a \tau_b)^5$   
⇒ positive  
⇒ tight

Intersection diagram

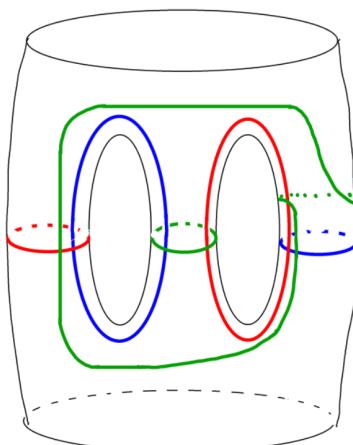

Branched cover over positive surface  
⇒ Stein

# Pieces of constructions of exotica

## 1. Gluck twists

$$X = X \setminus N(S^2) \cup S^2 \times D^2$$

$$X' = X \setminus N(S^2) \underset{q}{\cup} S^2 \times D^2$$

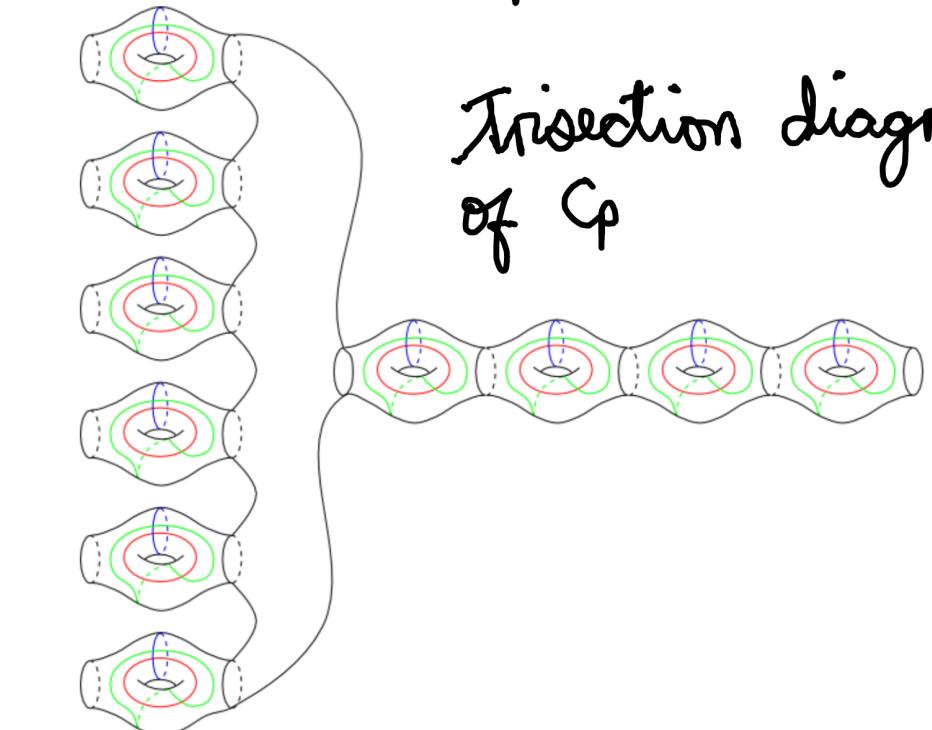

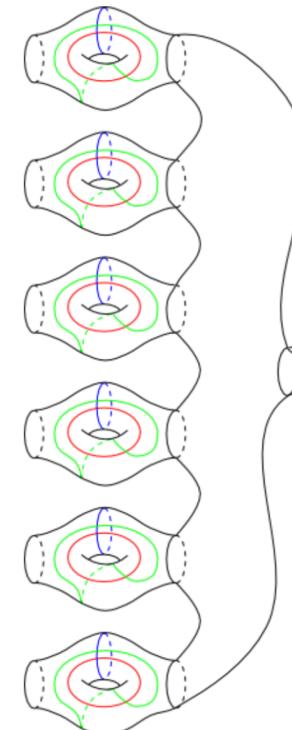

Trisection  
diagram for  
a  $D^2$  bundle  
over  $S^2$ .

## 2. Rational blowdown

$$X = X \setminus G \cup G$$

$$X' = X \setminus G_p \cup B_p$$

Trisection diagram  
of  $C_p$

plumbing

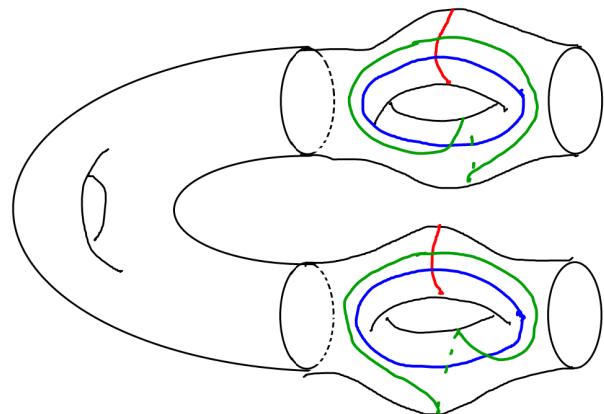

rational homology  
4-ball

# Pieces of constructions of exotic $\mathbb{C}P^2$

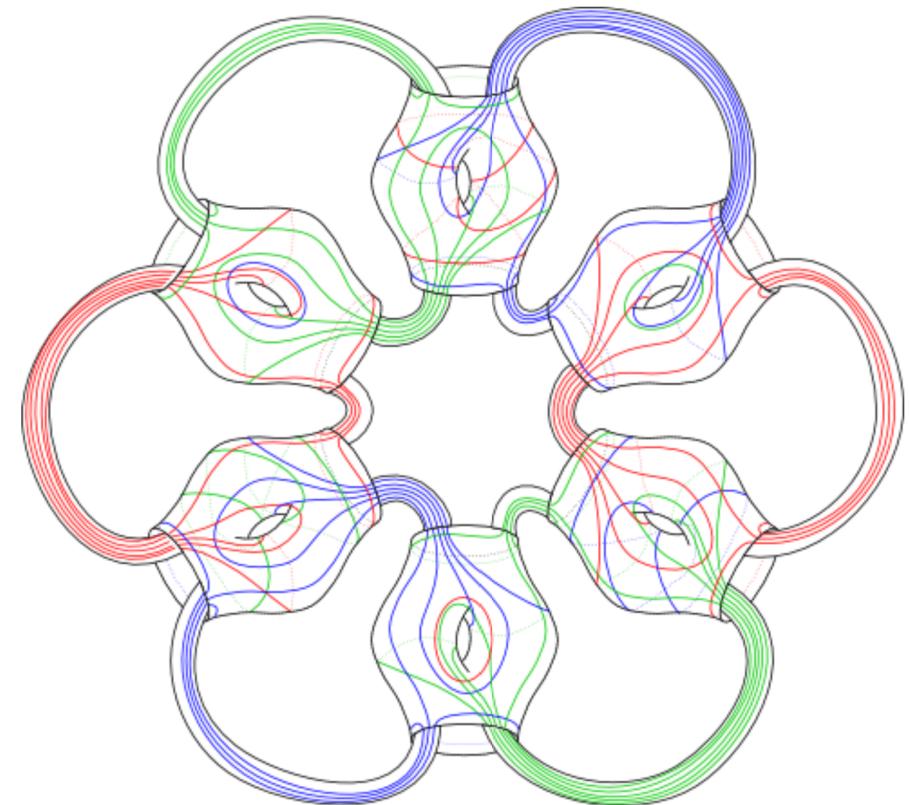

3. Fintushel-Stern knot surgery

$$X = X \setminus N(T^2) \cup T^2 \times D^2$$

$$X' = X \setminus N(T^2) \cup S^1 \times S^3 \setminus N(k)$$

Trisection diagram of  
 $S^1 \times S^1 \times D^2$

Trisection diagram of  
 $S^1 \times S^3 \setminus N(T_{2,3})$

# Finding the monodromy of the OB
